

IHOP Corp. Reports Fourth Quarter and Fiscal 2002 Results

February 26, 2003

GLENDALE, Calif., Feb 26, 2003 /PRNewswire-FirstCall via COMTEX/ -- IHOP Corp. (NYSE: IHP) today announced results for its fourth guarter and fiscal year ended December 31, 2002.

Fourth Quarter and Fiscal 2002 Performance

The Company reported a 3.3% increase of net income to \$12.0 million, or an increase of 1.8% in diluted earnings per share to \$0.56 in the fourth quarter 2002, compared with net income of \$11.6 million, or diluted earnings per share of \$0.55 in the fourth quarter 2001. For the twelve months ended December 31, the Company reported a 1.4% increase of net income to \$40.8 million, and a decrease of 1.0% in diluted net income per share to \$1.92 in 2002, compared with net income of \$40.3 million, or diluted net income per share of \$1.94 in 2001.

Julia A. Stewart, IHOP Corp. president and chief executive officer, said, "We are pleased with the execution of our business in the fourth quarter. However, 2002 was a year of building the foundation for the future of our Company by investing in branding, operations and corporate infrastructure. With our investment in 2002, and our previously announced new operating model, we have a clear path for 2003 and beyond."

System-wide sales increased 8.9% in the quarter and by 9.9% in the twelve months ended December 31, 2002 over the same periods in 2001. The sales increase is primarily the result of growth in the number of effective restaurants and increases in average per unit sales. Effective restaurants grew by 8.1% in the fourth quarter and by 7.4% for the twelve months ended December 31, 2002 over the same periods in 2001. System-wide comparable store sales decreased by 1.0% for the fourth quarter and increased by 0.7% for the twelve months ended December 31, 2002. In the fourth quarter 2002, total revenues were \$107.4 million, an increase of 18.8% over the fourth quarter 2001. For the twelve months ended December 31, 2002 total revenues were \$365.9 million, an increase of 12.8% over the same period in 2001.

In the fourth quarter 2002, IHOP franchised 49 restaurants compared to 40 in the fourth quarter 2001. For the twelve months ended December 31, 2002, IHOP franchised 100 restaurants, compared to 95 restaurants over the same period in 2001.

Brand and Operations Update

During the fourth quarter, the Company completed work on its new advertising campaign and revised media and promotional strategies that were launched in January 2003. The completion of these initiatives finalized the initial stage of IHOP's brand revitalization efforts. In addition, the Company developed a number of programs which should better position it for success in 2003 and beyond. An expanded mystery shopper program and improved service and food delivery procedures should increase guest satisfaction.

Outlook for 2003

As previously announced in January 2003, IHOP plans to transition from company-financed development of new restaurants to a traditional franchise development model during 2003. Taking this transition into account, IHOP provided the following performance guidance for fiscal 2003:

- * The development of 55 to 60 company-financed restaurants and 20 to 25 franchise developed restaurants, for a total of between 75 to 85 new restaurants. This compares with the development of 86 company-financed restaurants and 15 franchise/area licensed developed restaurants in 2002.
- * System-wide sales to range between \$1.55 billion and \$1.6 billion. This compares to system-wide sales of \$1.48 billion in 2002.
- * Net income per diluted share to range between \$1.55 and \$1.70. This compares with diluted net income per share of \$1.92 in 2002.
- * Free cash flow to improve to between a negative \$25 million and negative \$35 million. This compares with negative free cash flow of \$63.5 million in 2002.

Stewart stated, "2003 will be a transition year for IHOP. We will be required to execute our former business model while making substantive progress to our new operating model. Our financial targets for this year reflect the transition. As a result, we believe our full year 2003 net income per share will be between \$1.55 and \$1.70, and that our free cash flow targets will improve as we substantially reduce capital expenditures. In addition, we are still in the process of considering several strategic financial alternatives, and anticipate reaching a decision within the next 30 days."

As in prior years, there are a number of factors that influence operating results including primarily the magnitude and timing of new restaurant

openings and the number of franchise units reacquired, refranchised or closed by IHOP. Additionally, IHOP noted that the level of quarterly earnings can be dramatically affected by the timing of a relatively small number of franchise sales. For this reason the Company cannot predict earnings on a quarterly basis with precision, nor does it manage its business on such a basis.

- (a) "Effective restaurants" are the number of restaurants in a given fiscal period adjusted to account for restaurants open for only a portion of the period. It is calculated by dividing total restaurant operating days by 91 days for a quarterly calculation.
- (b) "System-wide sales" are retail sales of franchisees, area licensees and Company-operated restaurants, as reported to IHOP.
- (c) "Comparable sales percentage change" reflects the percentage change in sales for restaurants that are operated for the entire fiscal period in which they are being compared. Because of new unit openings and store closures, the restaurants opened for an entire fiscal period being compared will be different from period to period. Comparable average sales do not include data on restaurants located in Florida.
- (d) During the second quarter of 2001, the Company's area licensee in Japan negotiated an early termination of its area license agreement. As part of this early termination, the area licensee discontinued operations of its 32 IHOP restaurants. Sales for the twelve months ended 2001, include sales in Japan until their closing. Excluding the units in Japan, system-wide sales increased 8.9% for the quarter and 10.6% for the twelve months ended December 31; effective restaurants grew by 8.1% for the quarter and 8.5% for the twelve months ended December 31; and average sales per effective restaurant increased by 0.9% for the quarter and 1.9% for the twelve months ended December 31, in each case over the same period in 2001. In the fourth quarter of 2001, excluding the units in Japan, system-wide sales increased 10.2% for the quarter and 10.1% for the twelve months ended December 31; effective restaurants grew by 8.2% for the period and 8.0% for the twelve months ended December 31; and average sales per effective restaurant increased by 1.8% for the quarter and 2.0% for the twelve months ended December 31, in each case over the same periods in 2000.
